

# How To Play the Newspaper Tower Challenge Game

## Materials

- Several stacks of newspapers
- Masking tape

## Instructions

1. Divide the group into teams. Five or six people makes a good team size.
2. Give each team an equal amount of newspaper and masking tape.
3. Instruct them to build the tallest freestanding newspaper tower they can in 10 minutes. Freestanding means that it must not be leaning against anything and it must stand without touching anything other than the floor.
4. When the 10 minutes are up, the team with the tallest freestanding tower wins.

## Notes

To make it even more challenging, don't give them tape!

You can choose any amount of time which fits in your meeting plan. A longer time will result in bigger and more complex designs.
