

Homemade Model Magic Recipe

This recipe offers a variation from the commercial version, providing a texture that's not crumbly like typical homemade playdough. In fact, it boasts a lighter, softer feel that's a pleasure to work with.

You'll Need:

- A saucepan

Ingredients:

- 2 cups of baking soda
- 1 cup of cornstarch
- 1 1/2 cups of water
- [Food coloring](#)

Instructions:

1. In a large saucepan, combine the baking soda, cornstarch, and water.
2. Place the saucepan on medium heat and stir constantly. As you do, you'll notice the mixture gradually forming a ball of dough.
3. Allow the mixture to cool for a few minutes.
4. Next, divide the mixture into smaller sections, forming individual balls.
5. Take one of the dough balls and create a small hole in it. Add a bit of food coloring into the hole.
6. Knead the dough ball thoroughly to ensure the food coloring is evenly distributed. If you want a more vibrant hue, add more food coloring and knead again. Repeat this process with each dough ball.
7. To store your homemade model magic, place it in airtight containers. Remember to use it within 24 hours for the best results.
